Brain natriuretic peptide-32: N-terminal six amino acid
extended form of brain natriuretic peptide identified in
porcine brain.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Gaps

OIKAWA S., IMAI M., INUZUKA C., TAWARAGI Y., NAKAZATO H., MATSUO H.;

Structure of dog and rabbit precursors of atrial natriuretic

"Structure of dog and rabbit precusors of atrial natriuretic

"Structure of dog and rabbit precusors of atrial natriuretic

"POLYDPERTIGES deduced from nucleotide sequence of cloned cDNA.";

BIOCHEM. BIOPHYS. RES. COMMUN. 132:892-899(1985)

-!- FUNCTION: ATRIAL NATRIURETIC FACTOR (AMF) IS A POTENT VASOACTIVE

SUBSTANCE SYNTHESIZED IN MAMMALIAN AND IS THONGHT TO PLAY A

KEY ROLE IN CARDIOVASCULAR HOMEOSTASIS. HAS A CGMP-STIMULATING
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            ATRIAL NATRIURETIC PEPTIDE, ALPHA (ANP)

"Conformation in solution of porcine brain natriuretic peptide
determined by combined use of nuclear magnetic resonance and distance
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Gaps
                                                                                                                                                                                                                                                                                                                              CRAIK D., MUNCO S., NIELSEN K., SHEHAN P., TREGEAR G., WADE J.;
"The conformation of porcine-brain natriuretic peptide by two-
dimensional NMR spectroscopy.";
eur. J. BICCHEM. 201:183-191(1991).
-!- FUNCTION: VASOACTIVE ACTIVITY.
-!- TISSUE SPECIFICITY: BRAIN AND ALSO IN ATRIA, BUT AT MUCH LOWER
LEVELS THAN ANP.
-!- SIMILARITY: BELONGS TO THE NATRIURETIC PEPTIDES FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              GAMMA-BRAIN NATRIURETIC PEPTIDE.
